

## **Key Resources for Patient Safety Education**

### **AHRQ Patient Safety Network**

<http://psnet.ahrq.gov/>

This is an excellent, updated, and screened set of materials in this domain. Using the search function allows an educator to find plenty of free, online curricular toolkits, modules and resources.

### **AHRQ WebM&M Site**

<http://www.webmm.ahrq.gov/>

This site is a free, online repository of patient safety case studies compiled by the Agency to illustrate common, important issues across many clinical domains. The modules are interactive, with discussion questions, and can easily be integrated into existing learning programs.

### **AHRQ Advances in Patient Safety: From Research to Implementation**

<http://www.ahrq.gov/qual/advances/>

This site provides a gateway to a free 4-volume set of articles which address important clinical and policy problems, focusing on challenges, barriers and successful research endeavors. This compilation is available on CD, or in textbook form from the AHRQ.

### **VA National Center for Patient Safety**

<http://www.va.gov/ncps/index.html>

This is an outstanding site which presents excellent educational materials for use by educators and students alike. Searching on the word "curriculum" within the site takes you to <http://www.va.gov/ncps/curriculum/index.html>. This gateway link provides an organized matrix of downloadable materials for trainers, educators, and students.

### **National Patient Safety Foundation**

<http://www.npsf.org/>

This organization provides educational programs for those who wish to advance their knowledge and skills in patient safety, and in patient safety training and education. Not much downloadable materials, but an excellent overall site, anyways.
